PROFILE

Product Design Director with over 25 years of experience in product design, UX strategy, and creative leadership across global markets. Proven success in driving product innovation, managing multidisciplinary design teams, and leading high-profile projects for renowned brands. Expertise in delivering complex digital solutions, developing design systems, and ensuring alignment between business goals and user needs. **Leveraging AI to streamline design processes, generate data-driven insights, and enhance user-centric outcomes.** Adept at fostering cross-functional collaboration with product, engineering, and research teams, I have consistently delivered cutting-edge design solutions that drive commercial success.

KEY AREAS OF EXPERTISE

Scalable Design Systems: Extensive experience developing and implementing design systems across global teams, ensuring consistency and efficiency in multi-platform environments. Successfully aligned design strategies with business objectives, resulting in streamlined workflows and improved user experience for millions of users.

Predictive User Experiences through Machine Learning: Leveraged machine learning and AI to create hyper-personalised, data-driven experiences, predicting user needs to optimise content and engagement. Applied these innovations to drive substantial growth in user satisfaction and retention.

Creative Leadership and Innovation: Spearheaded the development of innovation cultures within design teams, fostering environments where risk-taking, experimentation, and strategic design thinking lead to breakthrough products and significant market differentiation.

Advanced Collaboration and Strategic Communication: Uniting multi-disciplinary teams across product, engineering, marketing, and operations to deliver cohesive design strategies. Influenced organisational design strategies at scale by aligning business objectives with creative processes.

EXPERIENCE

Global Creative Director Jan 2017 - April 2024

Deltatre | London, UK

- Directed product design and creative strategy for live and on-demand OTT solutions, including platforms for sports, entertainment, and media clients such as iTV, BBC, SONY, DAZN, NFL, UEFA, Discovery, and WarnerMedia.
- Spearheaded the redesign of pitch deck, product demos, sales materials, corporate presentations playing a key role in securing an 85-90% close rate for new business and defined the B2B brand.
- Defined and implemented iterative design processes, leveraging user research insights to create meaningful product experiences across web, mobile, and OTT platforms.
- Led a global team of designers, nurturing and developing talent across multiple disciplines, and fostering a collaborative culture that delivered seamless, user-centred products.
- Developed and championed a design system used across the organisation to ensure consistency and scalability in product design, enhancing both internal and external user experiences.
- Worked closely with product, engineering, and leadership teams to define and communicate product strategy, balancing user needs and business objectives, which resulted in over £120 million in revenue growth.

Design Director Jan 2013 - Dec 2017

Deltatre (formerly Massive) | London, UK + Sydney, AU

- Led global design teams, delivering multi-platform experiences across web, mobile, TV.
- Built innovation cultures within teams, enabling creativity and design thinking to thrive, leading to award-winning projects.
- Implemented rapid prototyping and testing methodologies, reducing time-to-market and enhancing product usability.

Director of User Experience and Strategy Jan 2009 - Dec 2013

LiquidHub (formerly THINK) | Atlanta, USA

- Led UX/UI design initiatives for clients across industries, integrating user-centered design methodologies into development workflows, ensuring seamless, engaging digital experiences.
- Implemented rapid prototyping and testing methodologies, reducing time-to-market and enhancing product usability.

- Played a key role in establishing user research and testing frameworks that informed product design decisions, significantly improving user engagement and satisfaction.
- Spearheaded the integration of UX strategy with business objectives, ensuring designs were both functional and aligned with client goals.
- Collaborated closely with cross-functional teams to develop product roadmaps and design strategies that supported long-term business growth.

Lead UX Designer Mar 2007 – Jan 2009
CDM Smith | Boston, USA

- Directed the design and user experience strategy for environmental and civil engineering projects, including applications that used GIS mapping to analyze pollution patterns and infrastructure.
- Developed and implemented UX frameworks that supported complex data visualizations for environmental monitoring and infrastructure planning.
- Worked with multidisciplinary teams to create interactive and user-friendly tools for clients in the public and private sectors, improving user experience across various platforms.

SKILLS

Strategic Leadership

Design Systems • Team Leadership • Innovation Culture • Cross-Functional Collaboration

Design & Development

Prototyping • Usability Testing • Product Design Strategy • Machine Learning for UX

Technical & Engineering

AI • Cloud Computing • React • Docker • Node • Continuous Development

AWARDS

- **SKYTRAX -** *Best Inflight Innovation* - 2017
- **GOOD Design Award -** *Digital Design: Interface Design,* 2015
- **Best Enhanced TV Service -** *ITV Awards*, 2015
- **AWWWARDS,**

… over 25 career awards

EDUCATION

Bachelor of Fine Arts, Graphic Design
Georgia State University • 1996 - 2001

Music Production
Academy of Music and Sound | 2021
Toolroom Records | 2019

CERTIFICATES

AI Engineering
IBM coursera | 2024

Flash Javacripts OOP Developer
Adobe-Macromedia
